		Jeffrey J	I. Restifo	3618					
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claim 4 recites the term "engine" which appears to refer to the fuel cell, however this term does not appear in the spec and also is generally reserved for power plants that produce mechanical movement, therefore the applicant should change the term to "fuel cell" for consistency with spec.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guidry et al. (US 7,108,091 B2).

Guidry et al. discloses a fuel cell vehicle comprising hydrogen tanks (or gas containers) 25 behind fuel cell stack (or engine) 30 in fuel cell box (not numbered) with ventilation 34 which flows from the rear of the fuel cell box towards the tanks and a

Art Unit: 3618

release pipe (not numbered) with release outlet 46 between said tanks, all of which is under floor 14 and between mainframes 7, as shown in figure 14 and recited in col. 7, lines 1-20. Guidry does not disclose the release outlet between the tanks and fuel ell stack. Guidry et al. does disclose the fuel cell stack on either side of the hydrogen tanks, as shown in figures 14 and 21. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the fuel cell stack on the other side of the hydrogen tanks, as shown by Guidry et al. in figure 21, in order to increase the space towards the front of the vehicle, which in turn would result in the release outlet being between the tanks and fuel cell stack.

With respect to claim 3, the location of the release outlet is not shown in figure 15, however the claim does not specify which center line of the tanks, lateral, longitudinal, etc., and simply shifting the location of the outlet is not viewed as patentable unless it produces an unexpected result and therefore It would have been obvious to one having ordinary skill in the art at the time of the invention to have located the release outlet above, below, or anywhere relative to a center line of the tanks in order to release hydrogen in a desired location or direction.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey J. Restifo whose telephone number is (571) 272-6697. The examiner can normally be reached on M-F 10-7.

Application/Control Number: 10/584,999 Page 4
